

3 Ways to Use Storage Units During a Life Transition

Once-in-a-lifetime transitions should be fun and exciting! A storage unit can help you eliminate stress and save time during a move.

Keep these 3 tips in mind when considering renting a storage unit:

Take the Pressure Off

- Upon arrival, simply unload and have peace of mind in the upcoming days of settling into your new digs.
- A self-storage unit buys you all the time you need to gradually move things in on a schedule that makes the most sense for your situation.

Find Room to Move

- A storage unit gives you the space to unload your belongings out of the way of your new living space, so you can avoid having to maneuver around things to unpack.
- Using a storage unit means more room in the home to organize and keeps breakables and family heirlooms out of the way.

Find Options to Meet any Need

- There are many options for sizes when it comes to self-storage. Moving from an apartment may only require a 10 x 10 space. Moving from larger homes, may necessitate a 10 x 20 or 10 x 30 unit.

Whether you're experiencing a career change, an addition to the family, a new relationship status, or a step into a new chapter of life, contact Bargain Storage to help make it a smooth transition.
